PROJECTS

Title   : **Online Job Portal**
Role   : Design, Development
Technologies   : Java, Spring Boot, Spring Security, SQL, Hibernate, JWT, REST APIs

DESCRIPTION:

Developed an online job portal with role-based security to streamline job postings and applications, providing a seamless and secure experience for both recruiters and candidates. The platform simplifies the job application process by generating a unique OTR ID for each user during registration, allowing users to apply for jobs efficiently without re-entering personal details. Integrated secure authentication mechanisms with OTP-based verification via mobile and email to ensure a fast and secure user experience.

PROJECT2

Title   : **Online Product Management**
Role   : Design, Development.
Technologies   : Java, Spring Boot, Spring Security, SQL, Hibernate, JWT, REST APIs

DESCRIPTION:

Developed a secure Online Product Management system using Spring Boot REST APIs, enabling seamless user interactions and comprehensive administrative control. The platform includes secure user authentication and role-based access to differentiate between users and administrators. It allows users to register, log in, and perform activities such as buying products, managing their cart, and retrieving product details (including by product ID). Administrators have full control over the product catalog with CRUD operations
